WHO CARES IF THE GROUND HOG GOT IT RIGHT,

IS STILL COMING! I PROMISE.

Spring is Springing! Yay! I just came inside from shooting a video outside and WOW! It's nice out! Yes I realize that when you get this and read it that it could be cold and rainy, but those cold days are just about over. Everyone loves Spring, primarily because it means... *summer is near!*

For many across this great country though, it's still **COLD**, grey, and snowy! One thing is for sure, this winter season is coming to an end. It does every year without fail.

Just like the weather seasons come and go, so do the seasons of life. Are you with me when I say that these seasons seem to come and go faster and faster as well as the time? Some of life's seasons will be **HOT** and others will be **COLD**, some high and some low. The lows we want to move by quickly, the highs we want to stay in forever. But it's the low points, those tough times, that I have learned the most from. All of the experiences through these seasons makes us who we are.

Unfortunately, there are some that will have a Spring Time they would much rather forget.

With all the beauty this Spring time brings, there is also the ugly for some. Just a few miles from where I'm typing this, **Children's Hospital of Orange County** has a full house of kids, many fighting for their lives.

For them and their families, Spring time is the furthest thing from their mind. Don't get me wrong, these families long to see their kids out in the yard playing or riding their bikes but for now, they are praying this will be a season of healing.

THANK YOU! This year, we'd like to give even more!

**AND remember, your
REFERRALS help the Kids!**

We are on a mission to raise \$50,000 for Children's Hospital of Orange County. We do this by donating to them a portion of our income from homes we sell. As you know Children's Hospital of Orange County does awesome work in helping kids fight through and survive nasty life-threatening diseases like cancer, Non-Hodgkin's lymphoma, leukemia and others. They also lead the way in early diagnosis of Autism and rapid recovery from spinal cord injuries.
